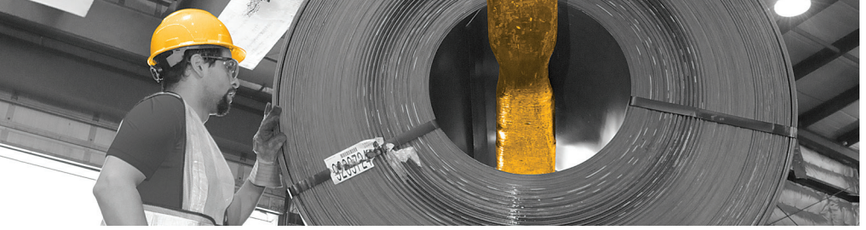
ARROW

ARROW RELOAD SYSTEMS INC.

A Superior Gateway To Your Markets



WHO IS ARROW?

For over 100 years Arrow Transportation Systems Inc. has been part of the transportation and distribution landscape in Canada and the United States. We provide high quality transportation, distribution, materials handling and specialty services to customers throughout North America.

We are known as a technologically innovative organization that is staffed by the best people in the industry. We pride ourselves as being a company that consistently delivers high quality service that meets or exceeds customer expectations at long term competitive rates. We value our relationships with employees, customers, suppliers and the communities in which we operate.

Our focus on safety, quality, service, people, technology and value allows us to move our customer's products in a timely cost effective manner.

ARROW QUALITY

Quality management is not only important in the care and handling of our customer's products but is equally critical in the quality of processes that are in place throughout our organization.

We handle our customer's products as if they were our own. We ensure that all products are well wrapped, clean, neatly stored and properly handled. Our detailed product quality processes integrate all operational activities from car unloading, truck loading, and inventory control, to documentation and value added services.

ARROW TECHNOLOGY

The effective use of technology plays a key role in our strategic direction and operational planning. We invest substantially in the development and implementation of beneficial technologies throughout all levels of our organization. We believe that this investment is critical for the improvement of service quality, refinement of operating processes, minimization of costs, quality of employee training, and consistency in labour management.
