

Our Commitment to Corporate Responsibility

At Arrow we are committed to integrating sustainable business principles and practices into all aspects of our company in a sensible manner whilst providing high quality transportation, materials handling and specialized services to satisfied customers. Our Corporate Responsibility goals are governed by our *Core Values* and have four main components – people, community, the environment and economic health.

People:

We look inward at our responsibilities to our employees, particularly with regard to the morale and effectiveness of our team, health and wellness support, and development.

Community:

We support the vitality of the communities in which we live and do business, with emphasis on charitable and volunteering initiatives.

The Environment:

We recognize the impact our business and industry have on the environment, and prioritize reducing the carbon emissions associated with our operations.

Economic Health:

We balance the requirement of positioning our business to grow and prosper economically over the long-term with supporting the economic health of our community.
